Swivel 360° LAMP

Light where you want it.

This innovative flush-mounted lamp can be turned by 360 degrees, allowing you to light where you effectively need. This feature makes it particularly suitable for lighting work surfaces (e.g. hob, writing desk, etc.). Like a normal lamp, it can be controlled using standard controls.

SWIVEL LAMP

Directional LAMP

New directional step marker lamp.

From now on you can add a touch of design to your home's lighting: the new directional LED lamp guarantees all the security you need and at the same time allows you to create comfortable rooms. AXOLUTE = ENERGY EFFICIENCY

BTicino innovation, always more and more attentive to the environment

Respect for the environment and compliance with the new building regulations, saving energy without compromising on modern life comfort is today possible. BTicino offers solutions for an environmentally intelligent management of lighting, and for the control of domestic energy consumptions.

Lower consumption, same light performance

With a constant 100 W light level (consumption of 100 W, filament = 70 W, halogen = 17 W LED), it is possible to obtain savings up to 65% by adjusting the dimmer to 25%.

ADJUST THE LIGHT LEVEL WITH MAXIMUM EFFICIENCY

With the new universal dimmer, it is also possible to control compact fluorescent lamps and LEDs, with current savings of up to 65%.

ZONE TEMPERATURE
CONTROL

HEATING AND COOLING ONLY WHEN REQUIRED

With BTicino temperature control systems (both traditional and MyHOME) it is possible to:

- virtually set the temperature of each single room,
- split the system into zones,
- activate the heating only when required, preventing it from being switched on with the windows open.

In addition, thanks to the zone temperature control, the building gains one energy class and users save on their bills.

CONSUMPTION DISPLAY
TOUCH SCREEN

A COMPLETE ENERGY CONSUMPTION AND PRODUCTION CHECK-UP

Display the consumptions of your own home - electricity, water and gas - and the production of energy and hot water obtained with photovoltaic panels systems, or with solar thermal systems. The information can then be used to make your system as efficient as possible, reducing waste and faults.

NEW ENERGY SAVING SWITCH

ENERGY SAVING SWITCH

AN INNOVATIVE AND AT THE SAME TIME INTELLIGENT CONTROL:

works like a normal switch allowing manual switching on and off of the managed load but it can also switch the light off automatically if it is left on. When no movement is detected for 10 minutes this new switch will in fact independently deactivate the load to which it is connected. It is the ideal product in both new systems and when replacing existing controls. Also, it does not require a neutral wire, totally zeroing consumptions when the light is off.

* SCREWLESS TERMINALS CAGE CLAMP®S: WIRING EXCELLENCE

Innovative automatic terminal for rigid and flexible cables.

The constant pressure on the cables guarantees optimal long-lasting contact: the problem concerning the half turn on the screw terminals is definitely solved.

- Simple and quick cabling: you just need to strip the cable and insert it directly into the terminal.
- Using a screwdriver for the opening will prevent accidental releases in boxes full of cables.

The two independent springs of the terminal guarantee a perfect grip for cables with different diameters, up to 2.5 mm²

Example of cabling with rigid cable

After stripping the cable, put it directly into the terminal

Use a screwdriver to pull out the cable

► CAGE CLAMP®S is a registered trademark of **WAGO** Kontakttechnik GmbH, Germany!

Before inserting the LED, detach the plastic tab and install the socket on the support.

Matt white cover plate that can be painted

BEFORE PAINTING THE MATT WHITE - AW COVER PLATE

AFTER PAINTING THE COVER PLATE

SUGGESTIONS FOR USE

The MATT WHITE cover plate can also be painted.

PAINTING

The matt white paint of the cover plates - **AW** - can be used as a primer. Before painting with house paint, the surface should be sanded/matted for better adhesion. Resin-rich products (e.g. water-based varnishes) should be used.

Notes

- Do not paint the devices (keys, sockets, etc.)
- Paint the cover plate separately and mount it when it is dry

CLEANING THE COVER PLATE

Water-based detergents should be used. Using ethyl alcohol or other solvents which could damage or soften the paint is not recommended.
