		TWO-WAY ENERGY SAVING SWITCH
<input type="checkbox"/> AM5003ES		Two-way Energy Saving switch with presence detector. It works as a traditional 2 way switch (manual ON, manual OFF) but it will automatically turn off the light if it doesn't detect any presence for 10 minutes. IR detection range, 8 meters, 160° - it is suitable with all type of loads that can be mixed on the same line: - 12-150W: halogen or resistive loads - 2-150VA: lamps with electronic or ferromagnetic ballast - 8-30W (or 650 mA): LEDs or CFLs Particularly suitable for places where a light can stay switched on for a long time such as garage and cellar, children's room, etc. No neutral wiring, 127-230V, 2 modules.

ENERGY SAVING SWITCH

NOTE:
Neutral **NOT** necessary.
Zero consumption
when the light is OFF

CONTROL BACKLIGHTING LED CONNECTION

Note for the connection of 230 V.a.c. (or 127 V.a.c.) LEDs for the backlighting of control devices: when LEDs are fitted to help locate the control itself, it must be taken into account that energy saving and fluorescent lamps do not allow in series connection of the LED on the load. It is therefore necessary to also take a neutral conductor near the control, so that the LED may be connected directly between phase and neutral, and will always be on.

THE ANTIMICROBIAL RANGE AND ANTI-REMOVAL COVER PLATES

The antimicrobial effect of MÀTIX devices and cover plates stems from the construction of their material based on silver ions (Ag+). This technology means that the antimicrobial range can guarantee the non-proliferation of bacteria, viruses and fungi without creating any immunisation or resistance effects (physical destruction and not chemical).

The effectiveness of BTicino's antimicrobial products has been tested by authorised laboratories. The usual cleaning procedures must however be retained in order to guarantee perfect hygiene. The ideal use for MÀTIX antimicrobial devices is in medical surroundings (hospitals, nursing homes, consulting rooms, diagnostic rooms and similar), public buildings (old peoples' homes, nurseries, toilet facilities, etc.) or catering facilities (canteens, bars).

HOTEL OFFER RANGE

This page lists the devices specifically intended for hotel room services. The BTicino hotel room offer range, and in more general terms for the hotel sector, includes however many more devices that are also used in other sectors, and are therefore listed in various sections throughout this catalogue.

Some of them are, for example:

- comfort devices = light, curtain, and scenario controls with dedicated symbols. Also, thermostats, and temperature probes with knobs
- audio and video devices = connectors for every need, and sound signalling devices
- safety devices = step lights, and emergency lamps
